USER'S MANUAL
TABLE OF CONTENTS

1.0   GENERAL INFORMATION

1.0   GENERAL INFORMATION

Negocio Conectar is a mobile application that professionals can use to connect with other people in the same profession. Users can use it to find jobs and even offer job positions. This software helps users to find useful insights and trends in the industry and their profession's community. It has a feed with news from all over the internet relate to the user's profession. It also has a section for writing notes, a calendar marked with all the important schedules of a user, a reminder and a AI based chatbot to answer all the user's queries related to their business.

1.1   System Overview

- This Negocio Conectar application was created by Group 21 of the CSD301 class during the monsoon semester 2018 at Shiv Nadar University under the guidance of Ms. Snighdha Biswas.
- Created using Android Studio, incorporating language including Java.
- System category:
  - *Major application:* Only the administration can create users. Users require a valid email address (for password recovery purposes).
  - *General support system:* The network support is provided by the Firebase server.
- Operational status:
  - Operational
- General description

    The Negocio Conectar appplication will allow an individual to create an account, post and search for job openings, make notes and reminders, connect with the community (get community posts) and get the news and trends.

1.2   Project References

All application templates code was taken from the Android Studio example codes. http://developer.android.com/studio/

1.3   Authorized Use Permission

Only individuals with the valid email ids will have the ability to create an account and login using their email ids after id verification to use the application functionalities. Backend can only be accessed by the administrator.

1.4   Points of Contact

1.4.1 Information

Mrs. Snighdha Biswas (Professor of Software Engineering):
-Email: snighdha.biswas@snu.edu.in

Samyak Bagra (Project lead):
-Email: sb472@snu.edu.in

1.4.2 Help Desk

Following are the responsible personnels to be contacted for emergency assistance.

Raghuram(Development lead):
-Email: hv829@snu.edu.in

Pranjal Sharma(Testing team):
-Email: ps549@snu.edu.in

Nitin Kumar(Test lead):
-Email: ni333@snu.edu.in

1.5   Organization of the Manual

1.0: General Information
        This section contains general information about the Negocio Conectar application, including the system overview, points of contact, project references, and acronyms and abbreviations
2.0: System Summary
        This section is an overview of the functionality the Negocio Conectar application contains in non-technical terminology.

This opens a form wherein one can add the details of any advertisement they want to post.

4.2   Special Instructions for Error Correction

In the event of the website being down, reference section 1.4 for technical help.

5.0   FUTURE ENHANCEMENTS

5.1   Future Functionality

There can be a lot of future scope for the application as current version at least. Some of the features like the community can be better integrated with the application after there has been some data collected from the customers.

Some of the other feature can be:

- Notes and reminders : Adding a feature to take notes and set reminders will increase the productivity if this application.

- Fraud Search : As more and more people start using the application, there is bound to be a group of people who will use the application in an unprofessional way. It will be important to find these people. This part of application might become necessity as the application grows.

- Improvement to News : The news is another part of application where a lot of improvement is possible. At present we take news from only one service provider, but with time we can add a lot of providers and can add a lot of features such as ranking the news, specialized news for different communities etc.

- Messaging : This can be added to the application so that different users can interact with each other.
